

Amendments to the Specification:

Please amend the title as follows:

DATA EDITING ~~DEVICE~~ APPARATUS, DATA EDITING METHOD, AND DATA
EDITING PROGRAM

Please amend the abstract on page 22 as follows:

~~According to the present invention, when~~ When image data is displayed on a monitor ~~is~~ and linked with audio data using a digital recorder as a remote controller, an operator is permitted to sequence a plurality of image data to sequentially select the image data. After sound recording is started through the digital recorder, the operator turns on a shutter button of the digital recorder, thus closing an audio file and opening a new audio file. Further, the next image data is displayed. After that, the operator turns on a stop button of the digital recorder to return a screen to an edit screen. Then, all of audio files currently formed are connected to each other in the order of selection, the plurality of ~~image~~ image data are linked as indexes with the connected audio files in the sequence such that each image data is inserted between the audio files, thus forming an audio album.
